

# Animated Image Gallery

DevFest 2020

## Description

The web has been evolving quite fast the last few years, and now it is very focused on images and how they can be presented, in this challenge, we put you to the test of making an animated image gallery using only HTML and CSS3, ok maybe also SASS if you prefer, but no more than that! JS is strictly prohibited.

The gallery should look something like this:

## Technical specifications:

1. Only HTML and CSS (we allow SASS).
2. Less than 50 lines of CSS.
3. No JavaScript.

## Assets

You can freely use [Unsplash: Beautiful Free Images & Pictures](https://unsplash.com/), for freely usable images.
